

Moving Forward

Workshop Objectives

- Current growth strategies “kill the golden goose”.
- Goals of General Plan are still current – new strategies and a more detailed picture of the end-state are needed now.
- Can the County step up to plan and manage the infrastructure?
- Significant progress has been made since 1998.
- Public participation in the planning process is needed.
- GEM is following the Utah heritage of planning for the common good. We are willing to do more sessions like this.
