RE: Bison Creek Subdivision, Wastewater Treatment Facility

The Weber County Commission met on October 25th 2011 and discussed whether or not they would be willing to act as the Body Politic for the proposed Bison Creek Subdivision wastewater collection and treatment facility. The Commission voted that they would be willing to act as the Body Politic for the facility to move the project forward.

The treatment facility being proposed is a package plant using the Advantex pre-treatment units. In addition to the package plant there will be a pressurized timed dosing drainfield to dispose of the treated effluent. It is our understanding that your office has been reviewing the project and feel comfortable that the system being proposed will properly treat the wastewater and will not adversely effect the water quality which we now find in the Ogden Valley. We request that you complete your reviews of the project and issue the necessary permits when your engineering office are satisfied with the design.

We thank you for the efforts you and your staff are taking to insure the public health issues are properly dealt with.

Thank You,

Jan Zogmaister
Commission Chair
